DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of claims 1-2 in the reply filed on 13 January 2006 is acknowledged. The traversal is on the ground(s) that examination of both device and method would not be a serious burden. This is not found persuasive because the different classifications require separate searches.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Each of these claims recites "a non-roughened surface region which prevents surface roughening" (claim 1, line 9; claim 2, lines 27-28). The phrase does not seem to accurately describe the invention taught in the specification. Figure 2, for example, shows at step c. a protective film 12, which prevents surface roughening (of the substrate adjacent the electrode) by protecting the substrate during the roughening. The end result of this protection is a non-roughened surface region, shown for example at 10 in step e. So the "non-roughened surface region" does not itself "prevent surface roughening", as stated in the claims. It seems to the examiner that the claims should specify either 1) a "non-roughened surface region," adjacent the electrode, or 2) the protective film or some other means "which prevents surface roughening." Specifying
